How to operate nursing homes

This practical book brings you a wealth of information on the establishment and operation of nursing homes, and care of residents. It treats every important consideration, including organization, administration, personnel, nursing services, hygiene of the aged, fire prevention, equipment, care of the bedridden, training, and nutrition.

MANAGEMENT OF NURSING HOMES

By RALPH C. WILLIAMS, M.D.; MARGARET B. ARMSTRONG, R.N.; JAMES F. GUNTER, B.B.A.; EDITH McCULLOCH, R.N.; and JACK STILLER

230 pages, 6 x 9, illus., $8.50

Five experts in the fields of medicine, public health, nursing, and administration show how to operate and manage nursing homes, and care for the aged. All necessary business forms, their uses and purposes, are described and clearly illustrated.

Suggestions are given on personnel policies, training programs, and diets. You will find useful information on standards of nursing care as well as on caring for the special ailments of the aged and senile.

Included is sound guidance on the administrator's relations with doctors, nurses, local merchants, employees, his residents and their families, and others.
